

## **Lectures**

It's a pleasure for me to share my SunWalk and Transatlantic21 adventures, impressions, and memories with others. I connect my experiences with my vision of planetary ethics. This value system will enable us to persist as a species on this unique planet, this oasis in the universe. What are the „ingredients“ of planetary ethics? What can each of us contribute?

Already as an adolescent I enjoyed to read and memorize poetry. Poems are an important part of my lectures.

Are you interested in one of my lectures?
